

nida Drewno

encasement systems for the timber load-bearing structure

The encasement system for timber columns is usually utilised in order to provide them with aesthetic masking. In order to construct such encasement it is possible to apply the system solution based on the Nida CD60 load-bearing structure with utilisation of the Nida KM fixing clips. The other simpler solution, which on the other hand is more prone to transferring loads originating from the

timber structure, is direct encasement (the boards are fixed directly with utilisation of the Nida wood screws). Specialists recommend application of the specialised Nida Twarda (DEFH1IR) boards for timber structures, as they possess the characteristics ensuring additional rigidity. Apart from that, those boards are resistant to moisture and mechanical damage of surfaces.

¹⁾ It is advised to apply the Nida Hydro plaster-fibre boards in the areas with the relative air humidity up to 85% and in the corner sections where intensive influence of water is expected (the horizontal and vertical surfaces in the vicinity of baths, showers, etc.)

CONSUMPTION OF MATERIAL PER 1 LINEAR METRE OF THE NIDA DREWNO ENCASEMENT FOR TIMBER LOAD-BEARING STRUCTURES

²⁾ Approximate consumption standard.

³⁾ For the Nida Twarda plaster-particle boards with fibres the Nida Max gypsum putty should be utilised.

IMPORTANT: How the "X" value is calculated. X=a+2b (where: a - width of the beam cross-section, b - height of the beam cross-section). The standards concerning the amount of utilised material do not cover the loss of the material.

nida Drewno

Fire resistance class:
N/A

Weight of 1 linear metre of encasement:
8,2-10,0 kg

Number of related document:
Siniat installation guidelines

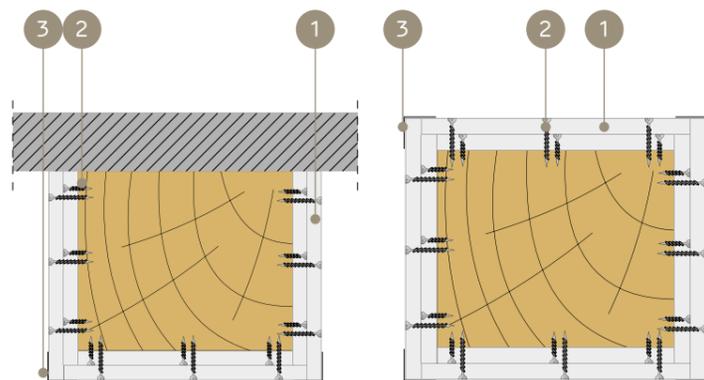

Siniat technology

SYSTEMS:
BDB/25

MATERIALS:

1. Nida plasterboard
2. Nida wood screws
3. Nida perforated aluminium corner profile
4. The joint between the plasterboards filled with the Nida gypsum compound with the Nida reinforcement tape
5. Nida gypsum putty

THE ENCASEMENT SYSTEM FOR THE TIMBER LOAD-BEARING STRUCTURES (BEAMS)
